## 1 Data Sources

The data source I am most interested in using in this class is Twitter data. I want to analyze Tweets tagging presidential primary candidates for sentiment analysis to compare against traditional polling numbers, and how these correspond to final primary results.

## 2 Questions

5d dataframe

6.4 dataframe and Spark dataframe

6.5b error occurs because a normal dataframe isn't designed for these commands

6.6b error occurs because a normal dataframe isn't designed for these commands
